Recycling Tip of the Month

September is here and that means that cooler weather is upon us. Time to get rid of some junk in the garage and basement. Also time to start painting and doing other projects that it was too hot to do this summer.

Remember old tires can be recycled at local garages. Do not place them out with your regular garbage.

Paint cans can be placed next to your garbage as long as they are either empty of the paint is completely dried

up in them. You can also use sand or kitty litter to absorb the paint left in the can.

PLEASE KEEP RECYCLING EVERY OTHER WEEK—YOU ARE MAKING A DIFFERENCE!
